**NEEDS WORK** **CRITICAL** **HTTPS enforced sitewide + HSTS (>= 6-month max-age)**

Enforce HTTPS sitewide and ship a Strict-Transport-Security header with max-age >= 6 months

**WHAT WE FOUND**

Confirmed the homepage is HTTPS (status 200), probed <http://yakattack.us/> for redirect behaviour, and parsed the Strict-Transport-Security header (value: "max-age=0").

How we checked: URL scheme + homepage status check, an <http://host/> redirect probe, and a Strict-Transport-Security max-age parse (>= 180-day threshold).

- HSTS max-age is below the 6-month minimum

Checked: [yakattack.us](http://yakattack.us)

**FAILED** **HIGH** **Product pages discoverable without JavaScript**

Make product pages discoverable without JavaScript

**WHAT WE FOUND**

Counted product pages discovered by the non-JavaScript crawl. None were found — JS-only storefront, products missing from sitemap, or the crawl was blocked.

How we checked: Count the product pages a non-JavaScript crawl could discover via the sitemap or initial HTML (no JS execution). The fetcher already attempted discovery; we read `ctx.pdpSample`.

- No product pages discoverable from a non-JavaScript crawl

Checked: [yakattack.us/sitemap.xml](http://yakattack.us/sitemap.xml), [yakattack.us](http://yakattack.us)

**FAILED HIGH Products are machine-discoverable**

Publish a product feed or a crawlable product sitemap

**WHAT WE FOUND**

Ran the discovery cascade (feed -> platform catalog -> typed sitemap -> content-verified crawl). Method: `none`; verified 0 product pages.

How we checked: Read the product-discovery cascade result from ctx.discovery. Score by discovery method (feed / platform\_api / sitemap\_typed -> pass when verifiedProductCount >= MIN\_CONFIDENT\_PRODUCTS; content\_verified -> partial; none or under-threshold -> fail).

- No reliable way for agents to discover your products

Checked: yakattack.us

**FAILED HIGH UCP profile carries all four required top-level keys**

Add every required top-level key to the UCP profile

**WHAT WE FOUND**

Profile is missing required key(s): signing\_keys.

How we checked: Read the profile root (or top-level `ucp` wrapper) and verify the presence of `version`, `services`, `capabilities`, and `signing\_keys` keys.

- Required top-level key `signing\_keys` is missing

Checked: yakattack.us/.well-known/ucp

**FAILED HIGH Each service satisfies the transport conditional field requirements**

Populate the conditional fields required by each service's transport

**WHAT WE FOUND**

Validated 1 services with recognised transports (0 satisfy their transport's required fields).

How we checked: For each services[] entry with a recognised transport, require the transport-conditional fields: rest/mcp -> endpoint+schema; a2a -> endpoint; embedded -> schema.

- Service is missing transport-conditional field(s)

Checked: yakattack.us/.well-known/ucp

**FAILED MEDIUM HSTS policy carries the includeSubDomains directive**

Add `includeSubDomains` to your Strict-Transport-Security header

- robots.txt has no Sitemap: directive

Checked: yakattack.us/robots.txt

**FAILED** **MEDIUM** Sitemap resolvable and includes at least one product URL

Publish a sitemap containing product URLs

**WHAT WE FOUND**

Tried to resolve an XML sitemap from robots.txt (Sitemap: directives) or /sitemap.xml. No entries were returned.

How we checked: Parse ``<loc>`` entries from the resolved sitemap (or sitemap index) and classify each against product-URL patterns (`/products/...`, `/product/...`, `/p/<id>`, etc.).

- No XML sitemap was reachable, or it contained no ``<loc>` entries

Checked: yakattack.us/sitemap.xml

**FAILED** **LOW** HSTS policy carries the preload directive
